

## MISERY INDESCRIBABLE FOLLOWS EARTHQUAKE

### Negroes Loot Ruins and Ghastly Scenes Are Being Witnessed Every Hour-- Loss of Life Estimated at 1,000 and Property at \$10,000--Washington Seis- mograph Records Only Minor Dis- turbance

Bulletin Special.

Kingston, Jamaica, Jan. 16.—All the houses within a radius of ten miles were injured by the earthquake on Monday and almost every house in the city was destroyed. Fire broke out after the earthquake and completed the work of destruction. The lower section of Kingston is a heap of smouldering ashes. The killed number about four hundred, and thousands were injured. The churches, public offices and hotels are all gone, but there were no fatalities at the Constant Spring hotel. Among the killed were Sir James Ferguson and prominent merchants and professional men. Sir Thomas, D.W.I., Jan. 16.—Reports received here from Jamaica say that it is estimated that a thousand persons have been killed by the earthquake and fire, and that ninety thousand persons are homeless. The damage to Kingston alone is placed at ten millions.

St. Thomas, Nov. Jan. 16.—Later advices received here from Jamaica declare that all people have been warned to keep away from Kingston. The death there is described as awful. There is no fodder for animals, famine is imminent, money is useless. The banks have been burned, but the sales are supposed to be intact. The misery on all sides is indescribable. Rich and poor are alike homeless. Provisions of all kinds are urgently needed. Loss of life is very

## KINGSTON SINKING INTO THE HARBOR

### Extra Despatch, at 2 p. m., From New York Indicates That Jamaica Capital May be Entirely Engulfed Within Few Hours

Bulletin Special.

New York, Jan. 16.—A cable received here from the stricken city today states that the shores of the harbor or Kingston, Jamaica, are sinking and that there is terror among the people as the city slips into the sea. According to a private wire received here

today from Port au Prince by a big New York mercantile institution, the harbor and foreland at Kingston is said to be sinking and in many places there is now ten feet of water in places which were heretofore dry land. Every wharf not destroyed by fire is said to have sunk into the sea and to have been rendered useless.

TOO WISE TO FIGHT.

Bulletin Special.

Caracas, Venezuela, Jan. 16.—Minister of War Arcejo, returning from the frontier of Colombia, where he went to battle with General Manilla, the revolutionary guerrilla, reports a bloodless victory. Collision is suspected.

FORGER WORKS BRANDON.

Bulletin Special.

Brandon, Jan. 16.—A sharp forger has victimized several of the local merchants. A number of checks, supposedly made out by McQuinn & Ireland have been successfully passed. The amounts vary from \$25 to \$40.

## CANADIAN PACIFIC CANCELS TRAINS

### Afternoon Trains on Calgary and Ed- monton Will Not Run Again Until Weather Moderates--Calgary-McLeod Trains and Lethbridge Local Also Cut Off Until Further Notice

The following official notice has been sent out by the C. P. R.:  
Owing to the continued unprecedented severity of the weather the Canadian Pacific railway announces that, effective from today, Jan. 16th, the following trains will be annulled till further notice: No. 15, leaving Calgary 1:15, and No. 16, leaving Strathcona 10:15. This will make No. 14 the morning train from Strathcona to Calgary, and No. 15 the morning train from Calgary to Strathcona. Also No. 113 leaving Lethbridge 6:45 and No. 114 leaving McLeod 4:15. In other words, the afternoon trains from Calgary are withdrawn, the morning train from Strathcona to Calgary is withdrawn, also the local train between McLeod and Lethbridge. These trains will not again be operated till the weather has given sufficient assurance of moderation.

## COMMITTED FOR TRIAL

### Walter Shuh Will Answer in Higher Court to Charge of Abducting Mar- garet McKenzie of Penhold. Admitted to Bail in Surety of \$2000.

Walter Shuh was brought up from Penhold, on Tuesday to Edmonton, and given his preliminary hearing before Dr. C. H. Stuart-Wade, J. P., in the police court yesterday. Mr. Hyndman appeared for the defendant, and Mr. Crawford, of Red Deer, for the prosecution. The charge against Shuh was the abduction of Margaret McKenzie of Penhold, last November. Mr. McKenzie, the girl's father, was the principal witness. The justice of the peace after hearing the evidence, committed Shuh to stand his trial at Wetaskiwin or any other place named by the supreme court. He was admitted to bail by giving sureties to the extent of \$2,000.

HARBOR HOUSE DESTROYED.

### Fargo Institution Loses \$100,000 by Fire Last Night.

Bulletin Special.  
Fargo, N.D., Jan. 16.—Damage to the extent of \$100,000 was done this morning to the wholesale hardware house of Bristol & Sweet. The block, which is one of the most profitable along Broadway, caught fire "presumably from a furnace, there were \$200,000 worth of goods ready for shipment, but the orders had been delayed by blocked roads. A \$7,000 order of leather had just been taken in to the warehouse last night. The loss is fairly well covered by insurance.

## THE COAL HAULERS THREATEN TO STRIKE

### Demand \$1.50 a Ton All Round for Hauling Coal from Clover Bar Mines to Edmonton. Meet- ing Held Last Night and Settlement Pending.

The coal situation which has been so vigorously canvassed the last few days (inspired to become dignified and complacent yesterday by the probable strike of the coal haulers. There is friction between the coal haulers on one hand and the coal dealers on the other. The friction arose from a want of uniformity in the tariff paid for hauling coal from the mines. All the coal haulers have been paying \$1.50 a ton except those hauling from Miners' mine who were receiving \$1.25 per ton by hauling by the river or \$1.50 by the land. As the Miners' mine was one of the farthest from the city, none of the coal dealers, seeing so many who one mine should pay more than another, attempted a reduction to \$1.25. It is the result that they have a strike on their hands. The haulers for the Edmonton Coal Company were out all day yesterday. Last night a meeting of the haulers and representatives of the miners was held at the Dominion dining hall and the matter discussed. The decision arrived at was to make a uniform tariff for all miners, namely \$1.50 a ton. As a result the haulers are all back today pending a final settlement on the matter. A meeting will be held on Friday evening to dispose of the matter.

## PRIVATE BILLS FLOODING LEGISLATURE

### Quebec House Has Long List on Order Paper For Session Which Opens To- day--Six Million Acres Open for Homesteaders--Good Returns From Timber Sales

Bulletin Special.  
Quebec, Jan. 16.—Ministerial measures promise to be comparatively few and unimportant for the Quebec Legislature this session, but the same cannot be said of private legislation. In fact the probability is that there will be almost twice as many private bills this session as last. Many are already printed and between two hundred and three hundred will be on the order paper by Friday. So far there are 381 of these bills in hand, though last year at the opening of the session there were but little more than sixty. A good proportion of them this year are of unusual length. The annual report can be equipped with charging hopper which allows for the preparation of the batch while the mixer is running. No moving valves. No need to stop on account of the hopper being full. No need to stop on account of the hopper being full. No need to stop on account of the hopper being full.

## RAILROADS FIGHT RE EXTENSIONS

### Canadian Northern Opposes C. P. R. Application For Prince Albert-Regina Charter on Grounds That They Do Not Intend Building Entire Line

Bulletin Special.  
Ottawa, Jan. 16.—The application of the Canadian Pacific Railway for a line from Regina to Prince Albert, was held over until the Minister of Railways had time to look into the objection taken by Mr. Mackenzie, Mr. Duggan, Mr. R. in getting a branch line under their original charter, could build the other end of the road and not the part starting from the main line. In the case Mr. Mackenzie said that he had no objection to the C. P. R. building from Regina to Saskatoon, but that the company might build from Prince Albert to Saskatoon and then go on to build the other part as well. Mr. Mackenzie said they intended building the whole way.

## RELIEF PARTY FOLLOWS POLICE

### Constables Stark and Shand and Guide Sam Adams Who Started for Grand Edgy of the McLeod Three Weeks Ago to Rescue Crazy Kancher Have Not Been Heard From

On December 22nd last Constables Stark and Shand of the R. N. W. M. Police, accompanied by Sam Adams, left for the Grand Edgy on the McLeod River, Lac Ste. Anne and about 100 miles distant from that place. Their mission was to capture a rancher named Storch who had reached there with about fifty horses from Cochrane and who had gone in search of the Grand Edgy. The report of his condition had been brought to Lac Ste. Anne by an Indian, who reported that the rancher had returned to his home in immediate danger from starvation and cold.

Since their departure no word has been received of the constables and it is thought they have gone astray or failed to capture their man. This afternoon Constable Munroe and Constable Dowling leave in search of the former party. They will be joined by a guide at Lac Ste. Anne.

It is not thought that the former party are in danger, for they are well equipped. They should have been heard from before this, however, and their long silence has caused some uneasiness.

MAPLE CREEK HAS NO COAL.

### Families Combine and Huddle Into One Room to Economize Fuel-- Hotels Entirely Full.

Bulletin Special.  
Maple Creek, Sask., Jan. 16.—The fuel situation is desperate here, and some of the hotels are entirely out of coal. Several families are now sleeping, eating and cooking in one room and in several cases families have combined to save fuel. Unless something is done at once there will be suffering, for the thermometer has been running from 30 to 40 below during the past week. Stock losses are also to be feared.

NORTH HAS THE PEOPLE.

### Official Returns of Alberta's Popula- tion Show That Most People Live This Side of Red Deer.

Bulletin Special.  
Ottawa, Jan. 17.—The complete official census returns for the Province of Alberta, which have just been broadcast down, indicate that there are 8,000 more people living to the north of Red Deer than to the south.

THE FISHERIES DISTRICT

Under a new arrangement of the fisheries district district number two comprises the entire Province of Alberta and the Mackenzie river district. The district formerly extended only as far south as Red Deer. Mr. Harrison Young is chief inspector for the district.

## COMMONS DEBATES CANAL SCHEME

### Proposition to Enlarge Welland Before Dominion House--More Elevators Want- ed at Lake Ports, Says Gorman-- Trivial Questions of Opposition Re- stricting Immigration Returns.

Bulletin Special.  
Ottawa, Jan. 16.—This was question and motion day in the house. The trivial character of the questions put this session have been freely commented upon. Nearly all the information desired is easily accessible in the government blue books. Not a day passes for instance, but there is a query as to the arrival of immigrants. This could be written from the interior report in less time than the member could obtain the question. Today Mr. Lavergne (Montgomery) was told that 9,100 immigrants arrived from France since 1906. The Minister of the Interior added that by personal canvass and advertising it was proposed to increase this immigration. Sir Wilfrid Laurier stated that the Hon. G. W. Ross, the Hon. John Cullen, Mr. Ross, Mr. Duggan, Mr. Giller and Mr. A. H. McNamee, had been called to the senate. Mr. Bennett (Simcoe) moved that the report of the transportation committee be acted upon at once. He said that the water route of the future was to be by Midland and Depot Harbor and not by the Welland canal. He said that the ports on the Atlantic coast were not there merely for the benefit of the Maritime Provinces but waiting the development of the West. There were harbors all along the Atlantic coast. He favored a fast Atlantic scheme which would utilize an overland route over New Foundland and then taking a fast steamer from New Foundland to Petit Rocher harbour in Gloucester county. The debate was not concluded when the House adjourned.

## BEWARE THE WILDCAT IN COBALT CAMP

### Directors of the Geological Survey Sends Out Timely Warning to Intending In- vestors--District is Undoubtedly Won- derfully Rich

Bulletin Special.  
Ottawa, Jan. 16.—Mr. Lowe, the director of the geological survey, in the summary report of the department of the effects of many of these properties, and in consequence the large sum that would be required from producers of a very moderate depth however there is ore in sufficient quantity to produce millions, and only a portion of the value has as yet been uncovered. There is no doubt that great values will be extracted from many of the properties about Cobalt. At the same time it might be wise for the investing public to consider the very large capitalization and abnormal prices of the stock of many of these properties, and in consequence the large sum that would be required from producers of a very moderate depth however there is ore in sufficient quantity to produce millions, and only a portion of the value has as yet been uncovered. ## THE CITY'S DISAGREEMENT WITH THE C.P.R.

Three important points in the negotiations with the C.P.R. company came out at Tuesday evening's council meeting.

The city solicitor stated that the city was in no wise bound by the tentative agreement. The council is therefore under no disability or restriction by reason of the tentative agreement having been made and may take the matter up at any time. In reply to a question, Mr. Beck said that in the event of an agreement being made for a separation of grades the damages would be divided between the city and the company. This appears to be about the best reason possible why the city should make an agreement for separating the grades.

If no such agreement is made the matter will be left under the direct jurisdiction of the Railway Commission—which appears to be what the company does not want. The city would not be treating with the city to settle the grades by agreement. The worst the Railway Commission would do would be to divide the damages; the best the C.P.R. has appeared willing to do is to say nothing about the damages and leave them to the city to pay.

The company claim that Athabasca and Peace avenues were not avenues when the plan was filed and that therefore it is under no obligation to come to the city for permission to close these avenues. But the company has come to the city for such permission and is even offering to insert a clause specifically leaving their re-opening in the hands of the Railway Commission. The company is not in the habit of negotiating to secure a favor what it can claim a right, and if the proposed streets are not streets should have no objection to a clause leaving it in the hands of the Railway Commission to reopen, when necessary any streets which may be temporarily closed. Either the company is into the proposed streets are streets or it is not, and being able to convince the Railway Commission that they are not streets.

The original problem for negotiation remains unchanged. The company claims that in allowing the city to place traffic attachments on its bridge it is granting a concession, and in return asks certain favors, regarding the closing of Jasper and all the avenues north and the further privilege of closing the two avenues west of Jasper. The question now to be decided is whether the "concession" is a concession, whether it is worth the price and whether it can be otherwise secured.

## EASTERN NEWS OF WESTERN AFFAIRS

It is a singular but familiar circumstance that the further west travels the more important it becomes when the news relates to the Canadian West, when it is of an undesirable character, and when it travels east.

Good news indeed is frequently a slow traveler, shows early signs of fatigue and perishes before it has got far afield. And though there has been a decided improvement of late this tendency is also specially noticeable of news originating in the West and making its way eastward. While the substantial resources of our western country and the progress we are making are too well known to be either denied or ignored the reception tendered news of these matters from the eastern Canadian press is frequently by no means of the riotously enthusiastic kind. News of such matters originating in the West by the solid column in the journey across the prairie is a kind of triumphal march, with banners and drums, a battery of "cannon" in every city need hamlet on route; but the long and dreary march across the North Slave both saps its vitality and diminishes its array; while paragraphs left before the devastating charges of the hideous sentences creep into Toronto to be greeted by a scattering hail of "machine guns" and "bombs" among the "patrons." Some day when "statutes" are enacted, when nobody has been mistaken for a deer in Muskoka, when a Royal Commission rests from investigating the eccentricities of high finance and when nobody's political wish is being

aired in the police court—on some such occasion the aged and crippled veteran may be mustered out and made to fill a gap in the daily review. This is as far as western "good news" usually gets and if perchance a straggling item wanders down to the Maritime Provinces, the form in which it is presented there to the public view is presented at a calculated to reflect little credit and bring less honor to the country of its origin.

Far different the eastern progress of an item of unfavorable character. Let a flurry of snow come in New or a degree of frost in June, or a hail-storm in July or a "wet spell" in August and observe the gestic publicizing concentrated on the entirely event. The snow fall may have supplied much needed moisture, the frost may have been too light to do any damage, the hail storm confined to a small or an unsettled area and the rainy "spell" in reality but a suggestion of showers distributed over the thousand miles of country between the rocks of New Ontario and the mountains. These trifling considerations do not appear to seriously affect the case. The point that gets emphasis all the way from the Great Lakes to the Atlantic is that the untimely event occurred, and not that it did no damage or that its damage was confined to a small area, and was on a negligible weight in the general result of the year's operations.

And it is not even necessary that the event be untimely so long as it is unusual and undesirable. It is eight inches of snow falls in two days, or if the mercury grows unusually modest and shrinks toward the bulb, and this in the dead of winter when frost and snow are supposed to be the common climatic conditions of the Dominion, all eastern Canada has the occurrence hurled at it in flaring headlines and double headed matter most morning. Not only so but the dash is served up with reliable, garish and trimmings calculated to both increase its palatableness and protect its memories. And the further east the more freely are the ligatistic condiments supplied, as distance from the local heliostats from the restraints of any rudimentary knowledge of the West.

The unusually severe winter being experienced by the West and the abnormal cold fall has of course received particular attention from the press of Eastern Canada and the manner in which the news concerning conditions here has frequently been thoroughly in accord with this custom. The mercenary performances have been exaggerated, the more fully multiplied beyond all recognition, the traffic drive, turned into a complete chaos, and the general conditions of the entire western country represented as precluding all possibility of comfortable and enjoyable living, where not actually inventing existence of any kind.

This of course is very amusing to the people of western towns and cities who go about their business as usual and carry on their recreations and social life without interruption. They know that the unusually cold cold weather neither interferes seriously with their comfort nor their enjoyment. There is a city in Canada today where people are enjoying more solid satisfaction and a more out of life than the people of Edmonton. Business is brisk, the trunks and coats are crowded in the stores are well patronized, school and church attendance is quite normal and social functions are being given with quite the usual "prosperity" in success. The conditions in Edmonton are largely the conditions throughout the entire West, except of course in a few communities where the difficulty of the railways has created a scarcity of fuel. If the railways of the West were prepared to handle the coal which the mines are prepared and anxious to produce and to receive the security in the few communities where it quite unnecessarily exists, the people of Western Canada would be the most contentedly satisfied people on earth. As it is there is not a single province in Eastern Canada where so few people today are suffering from hunger or cold as in the three provinces between the lakes and the mountains. This truly is not a country to be pardoned before the people of the East as a land of hardship and suffering.

While the extravagance to which the news of our western winter has been carried in the eastern press is ludicrous to western people there is a serious side and a very serious side to the question. The West wants people and to no people does it offer a greater welcome than to those whose conditions of life are not satisfactory in the eastern provinces. If the western country is to be established and maintained in their eyes as a country in which it is not desirable to live it is a matter of the greatest concern both to those people and to the country to which they are invited to come. In view of these possible consequences the Department of the Interior has instituted a special inquiry as to the actual conditions existing throughout the West, and the publication of the facts of the case should explode the extravagant notions which have been circulated to discourage people coming from Eastern Canada to find homes in this land of abounding opportunities.

## GARIEPY & LESSARD

## SPORTS CURLERS TROPHIES AT CALGARY 'SPIEL

Fourteen Prizes in the Points Competition—Contests to Go Twelve Ends—Big Banquet and Annual Meeting to be held on Evening of 22nd

Although it is an old story for curling in the city and there is not much likelihood of Edmonton winning a title to the Calgary trophy, which opens on the 22nd, yet local curlers of the boom and stone will be interested in knowing what prizes are being offered this year at the annual competition in the Alberta Branch of the Royal Canadian Curling Association.

It is possible some of the city curlers will go down for the gold and silver medals to be won in the points competition, which is open to any player of a club in good standing in the association who plays up an entrance fee of \$5.00.

Entries for the competitions must be made by January 15th. The winners of the consolation are A. L. Tanner and Joe Winn, Calgary, and the winners of the consolation are A. L. Tanner and Joe Winn, Calgary.

There are seven trophies to be awarded, while in the Grand Aggregate gold medals will be awarded to the winners of the points competition, and silver medals to the winners of the consolation.

Grand Challenge—Trophy for the champion curler, value \$100.00. Second prize for the runner up, value \$50.00. Third prize for the third place, value \$25.00. Fourth prize for the fourth place, value \$10.00.

Walker's Cup—Four articles of cut glass, silver or crystal, presented by Walker's Cup, value \$100.00. Second prize for the runner up, value \$50.00. Third prize for the third place, value \$25.00. Fourth prize for the fourth place, value \$10.00.

Burns Trophy—Four articles of cut glass, silver or crystal, presented by Burns Trophy, value \$100.00. Second prize for the runner up, value \$50.00. Third prize for the third place, value \$25.00. Fourth prize for the fourth place, value \$10.00.

Claret Trophy—Given by J. H. Payne Co., Granby, Que., and four articles of cut glass, silver or crystal, presented by Claret Trophy, value \$100.00. Second prize for the runner up, value \$50.00. Third prize for the third place, value \$25.00. Fourth prize for the fourth place, value \$10.00.

Victor Trophy—Given by J. H. Payne Co., Granby, Que., and four articles of cut glass, silver or crystal, presented by Victor Trophy, value \$100.00. Second prize for the runner up, value \$50.00. Third prize for the third place, value \$25.00. Fourth prize for the fourth place, value \$10.00.

Points competition—Open to all players of a club in good standing in the association who plays up an entrance fee of \$5.00. The winners of the points competition will receive a gold medal and a silver medal.

## FAST HOCKEY FOR TO-NIGHT

The Kenora Thistles are taking Arthur Ross and Joe Hall of Brandon east with them as spurs for the Stanley Cup games.

Pittsburg, of the professional league will tour Eastern Canada from February 18 to March 1st, and will include Toronto in the trip.

"Bob" McInnis, of Montreal, who for some years now has made a great reputation for himself as a hockey referee, will not act in the Stanley Cup matches, although he first agreed to do so.

The Ottawa Hockey Club met with a reverse Thursday night when they were defeated by the Wanderers. The highest Thistle player is Roy McInnis, who weighs 145 pounds. Point Griffin and Cover Point Ross go 145 and 145 pounds respectively. Cover Point Griffin, 23 years, is the oldest player and Russell Phillips, 22 years, is the youngest.

There are some ways than one of winning games in the O. H. A. Goldsmith is saying that the matches played at Clifton 12 players not played because the Clifton rink is not boarded up the sides or snow, that eight large teams coming from side to side block the puck and people sit on the ice and spectators to stand on the ice and interfere with the game.

The Victoria hockey club of Winnipeg started on a trip west today and have a long haul to make to the coast. The Victoria hockey club of Winnipeg started on a trip west today and have a long haul to make to the coast.

## THE BIG STORE ANNOUNCEMENT.

We wish to announce to the Public that we have Sold out our Store Business to Messrs DUNCAN BROTHERS & BUTTERS, who will take possession on the morning of the 16th January, 1907, and will continue on the Business in the Old Store and with the same old staff of employees.

We wish them success and prosperity, and we hope our old customers will stay with them, and trust they may in addition get many new ones.

We take this opportunity of thanking most sincerely all our past customers for their dealings with us, and wish them one and all a Prosperous and Happy New Year, and many of them.
